

#1 SELLING MANUKA HONEY IN NORTH AMERICA

RAW, Non-GMO Verified
Manuka Honey from New Zealand

Manuka honey is sourced from the flowers of the manuka bush (leptospermum scoparium), a shrub that is related to the tea tree. For decades, manuka honey has been renowned for its beneficial value. Wedderspoon sources one of the most genuine, ethical, and purest manuka honeys available on the market. Make Wedderspoon manuka honey a part your healthy lifestyle!

Guarantees over
90%
of the pollen grains in
the honey are manuka
pollen grains

THE BUZZ ON MANUKA

- Manuka is a shrub related to the tea tree plant.
- Manuka is native to and found in pristine wild regions of New Zealand, flowering only 2-6 weeks each year.
- Bees feed from the manuka flower to bring you this delicious, powerful and antioxidant rich honey.

Wedderspoon provides innovative solutions to support your lifestyle. We BEE-LIEVE in sourcing only the highest quality, genuine raw and non-GMO verified manuka and specialty honeys from New Zealand's pristine countryside. With over a decade of experience, our award-winning and number one selling products are available around the globe in more than 27 countries.

RAW FOR MAXIMUM BENEFIT

All our artisanal unpasteurised honeys are raw—meaning that they have not been heated over 42 degrees Celsius, which is the average temperature inside of a working bee hive. Raw honey preserves the natural bee enzymes, antioxidants, vitamins, minerals and other factors as nature intended.

KFACTOR™ GUARANTEE

REGULATED

Manuka quality is regulated by the New Zealand Government's Ministry for Primary Industries (MPI).

MEASURED

High manuka pollen count in every jar, more detail on KFactor 12, 16 and 22 inside.

GENUINE

KFactor is ONE of only THREE recognized systems to rate genuine manuka.

EXPERIENCE

Every jar of Wedderspoon honey is sourced, packed and labelled in New Zealand in our own certified production facility.
